POSITION STATEMENT

ELECTRONIC VERSION OF BULL AND BOAR STUNNING GUIDELINES

At the May or August 2010 meeting of the LWCC, RMAA presented a very useful guideline on correct techniques to stun large bulls and boars for slaughter. We would like to put this on our website. If this is acceptable, I request that you send an electronic version for easier placement. We can acknowledge you as the source unless you prefer to be anonymous.

Accepted: May/Augusts 2010

Sandra, please send this to Renier van Dyk and Gerhard Neethling asking for their guidelines. This is not yet a Statement.
