## **POSITION STATEMENT**

### **LIVESTOCK WELFARE AT SALES**

Livestock welfare can be severely compromised by selling at sales yards and auction sites. The entire process, from transportation of livestock to the site through to loading of sold animals afterwards needs acceptable facilities and management throughout. These requirements are codified in the SABS Standard **?????**. These requirements must be monitored by a systematic checklist to ensure that animal welfare standards are maintained at all sales of livestock. A simplified, standardised checklist should be used – this is available as an LWCC Code elsewhere on this website.
